ORGANIZATION AND FUNCTIONS OF THE MASSACHUSETTS BUREAU OF STATISTICS

Rooms 250-254, State House, Boston

Bureau is organized into five permanent divisions: 1. The *Administration*, charged with duties supervisory in relation to the several divisions; 2. The *Division*, engaged in the collection and tabulation of statistical and other information relating to matters affecting labor and the condition of the working people, as questions of general economic and social interest; 3. The *Manufactures* which collects and tabulates Statistics of Manufactures; 4. The *Municipal* which collects and tabulates Statistics of Municipal Finances, audits municipalities and installs accounting systems in cities and towns, and supervises the issue of town notes; 5. The *Public Employment Offices Division*, embracing the administration of the State Public Employment Offices, of which there are three, located respectively at 8 Kneeland Street, Boston; 47 Water Street, Springfield; and 48-52 Green Street, Worcester. During the period of taking and compiling the Census the sixth division, the *Census Division*, is organized.

The functions of the Bureau and the duties of the Director are summarized in Section 1 of Chapter 371 of the Acts of 1909, entitled "An Act to Provide for a Bureau of Statistics," as follows:

SECTION 1. There shall be a Bureau of Statistics, the duties of which shall be to collect, assort, arrange, and publish statistical information relative to the commercial, industrial, social, educational, and sanitary condition of the people, the productive industries of the Commonwealth, and the financial affairs of the cities and towns; to establish and maintain free employment offices . . . ; and to take the Decennial Census of the Commonwealth required by the Constitution and present the results thereof in such manner as the General Court may determine.

UNION SCALE OF WAGES AND HOURS OF LABOR IN MASSACHUSETTS, 1918.

INTRODUCTION.

This report is the ninth of a series of annual reports issued by this Bureau relative to the time-rates of wages and hours of labor prevailing in the organized industries and trades in Massachusetts.¹ The data herein presented were obtained principally as of the date July 1, 1918, at which time schedules of inquiry were sent, with few exceptions, to all of the local trade unions in the Commonwealth whose members were known to be working under a *time-rate* system.

In certain industries and trades, such as the boot and shoe industry, the textile industry, the metal trades, and the clothing trades, wages are paid principally on a *piece-rate* basis, but the piece-rates quoted are so numerous and the units of payment are so diverse that it has not seemed advisable to include them in this report. In those instances where organized workmen have endeavored to establish in an industry or trade a union scale of wages and hours of labor, but without any fair degree of success, such proposed scales have been omitted from this report. On the other hand, wherever, in any locality, a definite scale of wages and hours of labor has actually become effective in a strongly organized industry or trade, although it may not have been the subject of a formal, signed agreement between employers and employees, such scale has been included in this report.

The term "*time-rates of wages*", as used in this report, signifies the wages agreed upon in return for services for a specified period, *e.g.*, an hour, day, week, etc., and should not be confounded with *actual earnings*, since the earnings of employees depend both upon the rates of wages and

¹ Previous reports relative to time-rates of wages and hours of labor effective in the organized industries and trades in Massachusetts on the several dates specified were issued by this Bureau as follows:

- 1910 (October 1). Part I of the Forty-first Annual Report on the Statistics of Labor.
- 1911 (October 1). Labor Bulletin No. 91.
- 1912 (October 1). Labor Bulletin No. 96.
- 1913 (October 1). Labor Bulletin No. 97.
- 1914 (July 1). Labor Bulletin No. 107.
- 1915 (October 1). Labor Bulletins Nos. 114 and 115.
- 1916 (July 1). Labor Bulletin No. 120.
- 1917 (July 1). Labor Bulletin No. 124.

the number of hours, etc., for which payment is made. The rates of wages serve chiefly to show, by comparison with rates published in earlier reports, the upward or downward trend of wages. Although the rate of wages may increase during a specified period, a scarcity of work may effect even a reduction in the actual earnings during that period, while, on the other hand, an abundance of work, by making possible overtime employment or by reducing the amount of unemployment, may have a favorable effect upon the actual earnings even though the rate of wages may have remained unchanged. Again, in the case of employees receiving a daily rate, the working hours per day may be reduced, thereby increasing the rate per hour, but leaving the actual daily wages unchanged. Likewise, the granting of a weekly half-holiday, without loss of wages, effects an increase in the hourly rate of wages while the actual weekly earnings remain the same. The great demand for workmen during the war period made it possible for many workmen, both organized and unorganized, to command wages considerably in excess of the standard union rates which, under normal conditions, would prevail in the several localities. Usually, however, the union scale was retained as the standard, while the employees received additional compensation in the form of efficiency, service, and night bonuses, premiums, and overtime payments at rates in excess of those paid for work during the regular working hours.

Time-rates are calculated in various ways, but generally by the hour, day, or week. In this report the rate or unit shown is that reported by the union to this Bureau. In some cases the organizations have returned a rate per hour, per day, and week, as well as an overtime and a Sunday rate, thus indicating that each rate is in effect. In other cases a rate for only one unit of time has been returned, *i.e.*, for an hour or for a day, and in such cases only the rate returned has been entered in this report. Frequently the agreements between employers and labor organizations contain clauses to the effect that workmen commencing work shall be paid for at least one-half day even though the hours actually worked may amount to less than one-half day. These and other provisions relative to the method of calculating compensation which cannot be shown conveniently in tabular form are covered by notes accompanying the several tables.

The "*union scale*" establishes merely minimum rates, less than which members of the union to which it relates are not supposed to accept, and a maximum number of hours, in excess of which they may not work at the regular rate of pay, and in most cases the union rules provide that

definite penalties shall be imposed for failure of members to observe the working rules adopted by the union. In some localities and in certain trades workmen receive more than the prescribed minimum rate and in some instances employees work less than the prescribed maximum number of hours, such variations being generally the result of individual negotiations which are determined by special qualifications of the individual employee or by the peculiar conditions existing in any single trade or establishment. Agreements sometimes provide that old and infirm employees may work for less than the union scale. Except where otherwise noted, this report has reference only to the *minimum* rates of wages and *maximum* number of hours which have become effective in the various organized trades, and does not purport to show the extent to which there may be individual variations from the established scales.

The authority for the data presented in this report has been derived in most cases from information furnished by organizations of employees. Exceptions appear, however, in the case of employees in the steam and electric railway service and in telephone, telegraph, and federal service, regarding whom the necessary information was obtained from wage scales furnished for the most part by the employers.

The preparation of this report has involved much correspondence with the officers of the various labor organizations in this Commonwealth and also a considerable amount of field work on the part of representatives of this Bureau. To some extent, also, it has been necessary to confer with the employers in order to supplement or confirm the data obtained from trade union officials. It is especially gratifying to be able to state that in the preparation of this report the Bureau has received, almost invariably, the cordial and painstaking assistance of those whom it has been necessary to consult.

A. GENERAL GROUP OF TRADES.

¹ In some localities a weekly wage of a stated amount is guaranteed and also a bonus consisting of a portion of the weekly receipts, exceeding a specified sum, taken in by each barber. Thus the bonus consists of one-half of the receipts in excess of \$20 in Haverhill and Rockland; in excess of \$21 in Boston; in excess of \$22 in Fall River, Framingham, Gloucester, Natick, and Waltham; in excess of \$23 in Lynn; in excess of \$24 in Brockton, Lawrence, Newburyport, and Quincy; in excess of \$25 in North Adams and Salem; and in excess of \$27 in Pittsfield.

² In localities where a barber is allowed a specified number of hours as a half-holiday each week, but on no stated day, the number of hours worked on a half-holiday varies according to the length of the day on which he takes such half-holiday. For example, if five hours is the time allowed as a half-holiday, and a barber takes it on a ten-hour day, he works on that day five hours, whereas if he takes it on an 11-hour day, he works six hours on that day.

³ Have two half-holidays weekly; one on Thursday and one on another day not stated.

⁴ Rates and hours effective July 15, 1918.

⁵ On August 1, 1918, rate was increased to \$20 and men were given one-half hour off on Tuesday, Thursday, and Friday.

⁶ Minimum weekly rate with accompanying bonus; agreement specifies that for those receiving higher weekly rates of wages, one-half of the receipts over stated amounts, varying with amount of weekly wages, shall be paid.

⁷ On October 21, 1918, rate was increased to \$18.

⁸ On October 1, 1918, rate was increased to \$22.

⁹ Men get 5¹₄ hours off each week or 10¹₂ hours (full day) every other week.

¹ See *General Note* following.

2 An increase of 50 cents per week is granted every six months until maximum salary is reached.

General Note. — The data with reference to telephone employees were compiled from information furnished by the New England Telephone and Telegraph Company as of July 1, 1918.

The rates shown above apply to all employees of the Company covered by the several schedules, irrespective of their connection with unions of their craft. In each of the following municipalities there is an organization of telephone operators: — Boston (also an organization of clerical telephone employees), Brockton, Concord, Fall River, Fitchburg, Framingham, Greenfield, Haverhill, Lawrence, Lowell, Lynn, New Bedford, Newburyport, North Adams, Pittsfield (including Great Barrington), Salem, Springfield, Taunton, Uxbridge, and Worcester.

The exchanges were classified in seven groups and a different wage schedule has been adopted for each group of exchanges. The exchanges in Massachusetts to which the several schedules apply are as follows:

Metropolitan Wage Schedule — Boston, Metropolitan Division.

Schedule AA.

Brockton.	Holyoke.	Lynn.	Salem.
Fall River.	Lawrence.	New Bedford.	Springfield.
Haverhill.	Lowell.	Pittsfield.	Worcester.

Schedule A.

Fitchburg.	Taunton.
------------	----------

Schedule B.

Framingham.	North Adams.
Gloucester.	Northampton.
Greenfield.	—

Schedule C.

Amesbury.	Danvers.	Marlborough.	Saugus.
Amherst.	Falmouth.	Middleborough.	Sharon.
Andover.	Franklin.	Milford.	Southbridge.
Athol.	Gardner.	Nahant.	Stoughton.
Ayer.	Hudson.	Natick.	Walpole.
Beverly.	Hyannis.	Newburyport.	Wareham.
Buzzards Bay.	Leominster.	Peabody.	Webster.
Chicopee.	Mansfield.	Plymouth.	Westfield.
Clinton.	Marblehead.	Rockland.	Whitman.
Concord.	—	—	—

TABLE 12. TELEPHONE AND TELEGRAPH SERVICE — CONCLUDED.

Schedule D.

Beverly Farms.	Hamilton.	Nantucket.	Scituate.
Bridgewater.	Ipswich.	Oorchard.	Ware.
Cotuit.	Lee.	Palmer.	Westborough.
Easthampton.	Manchester.	Rockport.	Winchendon.
Great Barrington.	Martha's Vineyard.		

Schedule E.

Adams.	Huntington.	Northfield.	Stockbridge.
Bryantville.	Leicester.	Orange.	Townsend.
Chatham.	Lenox.	Orleans.	Turners Falls.
Dalton.	Ludlow.	Pepperell.	Uxbridge.
Foxborough.	Maynard.	Provinceetown.	Warren.
Georgetown.	Medfield.	Sagamore.	West Acton.
Gilbertville.	Millbury.	Sheffield.	Whitinsville.
Groton.	Monson.	South Deerfield.	Williamstown.
Hanover.	North Brookfield.	Spencer.	Woods Hole.
Harwich.	North Easton.		

The hours of labor for clerks are usually 48 per week (six days of eight hours each) and for operators range from 32 to 48 per week, varying according to exchanges and time of assignment.

Student operators and operators on afternoon-evening and on forenoon-evening assignments work one hour per day less and are paid \$1 per week more than day operators of corresponding service.

Student operators and operators on evening assignments (4 P.M. to 10 P.M., including relief period) work two hours per day less and are paid the same wages as day operators of corresponding service.

Student operators and operators on "night first-half" assignments work two hours per day less and are paid \$1 per week more than day operators of corresponding service.

Operators on "night second-half" assignments (10 P.M. to 7 A.M., including lunch and relief periods) are paid \$2 per week more than day operators of corresponding service. (Metropolitan Division — 11 P.M. to 7 A.M. — \$1 more.)

Operators and senior operators on half-night assignments (10 P.M. to 7 A.M., sleeping 12 to 6) are paid the same wages as they would receive on day assignments up to a maximum of \$11. (\$10 — Class C.) (\$9.50 — Class D.)

Senior operators, junior supervisors and supervisors on afternoon-evening and forenoon-evening assignments work one hour per day less and are paid \$1 per week more than they would receive on day assignments. If assigned to "night second-half" (10 P.M. to 7 A.M., including lunch and relief periods) they are paid \$2 per week more than they would receive on day assignments.

Senior operators, junior supervisors and supervisors on evening assignments work two hours less than if assigned to day work.

Senior operators, junior supervisors and supervisors on "night first-half" assignments work two hours per day less than if assigned to day work and are paid \$1 per week more.

Operators appointed to junior supervisors' positions will be advanced \$1 and while in the grade will be increased \$1 at the end of each year's service in the Company until the maximum salary for the grade is reached.

Junior supervisors appointed to supervisors' positions are paid the minimum supervisor's wage.

Supervisors are paid an increase of 50 cents per week every six months until maximum salary for the grade is reached.

Junior supervisors are paid \$1 more per week than operators of corresponding service.

Part-time operators receive 16 cents per hour on assignment, 17 cents at end of three months, 18 cents at end of six months (schedule B, at end of 10 months), 19 cents at end of 12 months, and 20 cents at end of 18 months.

¹ Rates of wages shown are rates per day except where otherwise specified, and were those in effect on July 1, 1918. Since that date the rates have been revised in a large number of instances and some new positions have been added. Salaries of officials receiving more than \$2,760 per annum are not shown. Eight hours constitutes a day's work for all mechanics, laborers, and workmen. Per diem employees are paid for each day upon which they render service and are paid, in addition, for all holidays. Employees whose pay is either annual or monthly are paid for thirty (30) days in each month, and, if called upon, are required to render service on each day.

² Rate per year.

³ Rate per month.

⁴ Rate per year; rates for different classes not specified.

⁵ Rate per month; rates for different classes not specified.

C. STEAM AND ELECTRIC RAILWAY SERVICE.

STEAM RAILROAD SERVICE.

Introductory Note. — The information presented in the following table (Table 18) has reference to those occupations, only, which are peculiar to railroad service and which relate primarily to the operation of trains. The rates of wages and hours of labor as in effect on July 1, 1918, appear in the table. Certain general changes which have taken place since that date have been discussed in notes accompanying the respective groups of occupations to which they severally refer.

It is the custom of the steam railroad companies operating within this Commonwealth to issue from time to time printed "Rules," applicable to employees in the several branches of service, showing the rates of pay, hours of labor, and other conditions of employment. These printed rules virtually constitute written agreements between the companies and their employees. Owing to the varying nature of the several branches of service it is exceedingly difficult to present in one uniform tabular statement the essential items of information contained in these schedules. Thus, conductors, trainmen, locomotive engineers, and locomotive firemen receive compensation based on mileage covered, but certain minimum rates of wages an hour, day, or month are guaranteed. For employees engaged in station and other local service the rates of pay and hours of labor vary according to local conditions. The hours of labor of those who are actually employed in the movement of trains, including conductors, locomotive engineers, locomotive firemen, trainmen, and telegraph operators, are regulated by Federal law.

In view of the foregoing considerations it was deemed advisable to present the information in a series of tabular statements, each of which has been so devised as to bring out the essential facts with reference to the several occupations considered therein. Data with reference to steam railroad employees are presented for four railway systems operated in part or wholly in Massachusetts, designated by capital letters as follows: (A) Boston and Albany Railroad, (B) New York, New Haven, and Hartford Railroad, (C) Boston and Maine Railroad, (D) Boston, Revere Beach, and Lynn Railroad, and for the South Terminal, Boston. It will be observed that the rates of pay and hours of labor applicable to employees in train and yard service are quite uniform for three of the railroad systems considered. Attention is called to the fact that the rates of pay and hours of labor applicable to railroad employees are not confined merely to those portions of the several railroad systems which are within the confines of the Commonwealth, but apply likewise to the entire systems.

¹ When more than one rate is paid, the maximum and minimum rates only are shown. The rates paid to employees in some occupations vary according to priority of service or local conditions.

Railroad A. — Except where otherwise stated, rates are for outside of Boston.

Railroad B. — Each rate is for outside of Boston.

Railroad C. — Except where otherwise specified, same rates apply to Boston and outside of Boston. Basic eight-hour day went into effect on July 1, 1918. In many cases, however, road was unable to place all employees under its provisions during 1918, so employees worked former hours on this basis; $1\frac{1}{3}$ T for 9th and 10th hours and $1\frac{1}{2}$ T thereafter.

Railroad D. — Except where otherwise stated, same rates apply in Boston and outside of Boston. All overtime is at the rate of $1\frac{1}{2}$ T.

South Terminal. — Each rate applies to Boston only. All overtime is at the rate of $1\frac{1}{2}$ T.

² Eight-hour day, but for 9th and 10th hours, if worked, men receive regular rate; all other overtime, $1\frac{1}{2}$ T.
